r my personality. I love to be

for too many hours. I do it

with my life tone. I just love and

Hasan,

You have a lot of good ideas here, but your focus is off. Review the prompt and my marginal comments. The goal of the essay is to describe the space (your bed) and connect those descriptions to your personality. The paper should be structured on those connections, not on the activities you do there. I'm happy to chat about revision if you choose to revise for extra credit. See the syllabus for those guidelines too.
