

Other topics that I may ask you on the exam are:

- Foreign exchange risk: What are the foreign exchange risks? How can you reduce the foreign exchange risk?
- Advanced Energy's tax structure: Should it be improved? How?
- Investor relations: Given your financial forecast and CEO recommendations, what do you believe should be the priorities in Advanced Energy's shareholder communications?
- Mergers and acquisitions: Have the acquisitions added to or subtracted from shareholder value?
- Capital budgeting: I may ask you to evaluate a capital expenditure opportunity (for example, a plant expansion).
