

Assignment Instructions

Unit 9 Final Project, Part 3 of 3: PowerPoint: MediSky - Health – Presentation

Unit outcomes addressed in this Assignment:

- Correctly demonstrate basic skills in PowerPoint.

Course outcome(s) addressed in this Assignment:

HS115-3: Build presentations that effectively communicate ideas using multimedia applications.

HS115-4: Manage data and documents by integrating appropriate programs.

HS115-5: Demonstrate how these programs are used by healthcare professionals and in a healthcare environment.

Instructions:

In this exercise, you are tasked with creating a 6-slide presentation, detailing the new organization, Medi-Sky Health. This presentation will be playing as people enter the celebration and will continue to play throughout the day.

Download the Unit Nine-MediSky-Health Presentation.pptx file, found in the Student Data File of Doc Sharing, and begin to format the presentation using the formatting options of your choice. Your presentation must include:

- A presentation design theme applied
- At least two graphics, either pictures or clip art, added to the presentation, where you deem appropriate.
- Add one Smart Art Graphic
- Apply a slide transition, to all slides.
- Apply consistent slide timing to all slides.
- Animate at least two objects in the presentation. Can be pictures, tables, text, etc...
- Add your name in the footer to appear on all slides, except slide 1.
- ~~Save the file as: Unit 9-MediSky-Health Presentation – Student Last Name~~
