Financial Final Paper Part 1

**Today's economy has shown signs of recovery following the crash the financial markets in 2007/2008. In light of this, many companies have re-evaluated their financial statements to determine the most effective way to use company monies in order to take advantage of the up beat in sales. For your final paper, you will be required to analyze the financial statements of (2) two companies and (1) one private that you believe are recovering or have recovered from the recession and would make a great investments to moderate investors looking for growth and preservation of capital.**

(Please attach and email final paper and all company financial reports prior to class to profgibbspring@gmail.com )

1- A description and services or products currently provided by the company.
2- Company symbol(s) (Not Applicable for Non-Public company)
3- Stock Price for one consecutive week staring August 10, 2015 (Not Applicable for Non-Public company)
4- Past and current news that you believe has and will impact company stock prices
5- Changes in executive or managerial staff in the past (3) three years. If any, how has it impacted the businesses?
6- Based on the review of the firms annual audit and auditors reports where there any areas of concern/improvement?
7- The current financial position of your company in comparison to the prior (3) three years? Has there been a decrease or increase sales? (Please list the financial position for each year)
8- Do you believe your company is adequately managing funds? If you were hired as the financial analyst and opportunity analyst, what business changes will you implement in order to increase the firm's financial position and stock holder interest? Please list what financial statements were used to support your argument.
9- What is the current valuation of your two publically traded companies? Do you believe they are properly valuated?

**The length the paper will be a minimum of 5 pages and will be due on the last day of class via email.**
