

TEMPLATES FOR DISAGREEING, WITH REASONS

- ▶ X is mistaken because she overlooks recent fossil discoveries in the South.
- ▶ X's claim that _____ rests upon the questionable assumption that _____.
- ▶ I disagree with X's view that _____ because, as recent research has shown, _____.
- ▶ X contradicts herself/can't have it both ways. On the one hand, she argues _____. On the other hand, she also says _____.
- ▶ By focusing on _____, X overlooks the deeper problem of _____.

You can also disagree by making what we call the "twist it" move, in which you agree with the evidence that someone else has presented but show through a twist of logic that this evidence actually supports your own, contrary position. For example:

X argues for stricter gun control legislation, saying that the crime rate is on the rise and that we need to restrict the circulation of guns. I agree that the crime rate is on the rise, but that's precisely why I oppose stricter gun control legislation. We need to own guns to protect ourselves against criminals.

In this example of the "twist it" move, the writer agrees with X's claim that the crime rate is on the rise but then argues that this increasing crime rate is in fact a valid reason for *opposing* gun control legislation.

At times you might be reluctant to express disagreement, for any number of reasons—not wanting to be unpleasant, to hurt someone's feelings, or to make yourself vulnerable to being disagreed with in return. One of these reasons may in fact explain why the conference speaker we described at the start of Chapter 1 avoided mentioning the disagreement he had with other scholars until he was provoked to do so in the discussion that followed his talk.

As much as we understand such fears of conflict and have experienced them ourselves, we nevertheless believe it is better to state our disagreements in frank yet considerate ways than to deny them. After all, suppressing disagreements doesn't make them go away; it only pushes them underground, where they can fester in private unchecked. Nevertheless, disagreements do not need to take the form of personal put-downs. Furthermore, there is usually no reason to take issue with every aspect of someone else's views. You can single out for criticism only those aspects of what someone else has said that are troubling, and then agree with the rest—although such an approach, as we will see later in this chapter, leads to the somewhat more complicated terrain of both agreeing and disagreeing at the same time.

AGREE—BUT WITH A DIFFERENCE

Like disagreeing, agreeing is less simple than it may appear. Just as you need to avoid simply contradicting views you disagree with, you also need to do more than simply echo views you agree with. Even as you're agreeing, it's important to bring something new and fresh to the table, adding something that makes you a valuable participant in the conversation.
