

- ▶ Although X makes the best possible case for universal, government-funded health care, I am not persuaded.
- ▶ My view, however, contrary to what X has argued, is that _____.
- ▶ Adding to X's argument, I would point out that _____.
- ▶ According to both X and Y, _____.
- ▶ Politicians, X argues, should _____.
- ▶ Most athletes will tell you that _____.

BUT I'VE BEEN TOLD NOT TO USE "I"

Notice that the first three templates above use the first-person "I" or "we," as do many of the templates in this book, thereby contradicting the common advice about avoiding the first person in academic writing. Although you may have been told that the "I" word encourages subjective, self-indulgent opinions rather than well-grounded arguments, we believe that texts using "I" can be just as well supported—or just as self-indulgent—as those that don't. For us, well-supported arguments are grounded in persuasive reasons and evidence, not in the use or nonuse of any particular pronouns.

Furthermore, if you consistently avoid the first person in your writing, you will probably have trouble making the key move addressed in this chapter: differentiating your views from those of others, or even offering your own views in the first place. But don't just take our word for it. See for yourself how freely the first person is used by the writers quoted in this book, and by the writers assigned in your courses.

Nevertheless, certain occasions may warrant avoiding the first person and writing, for example, that "she is correct" instead of "I think that she is correct." Since it can be monotonous to read an unvarying series of "I" statements ("I believe . . . I think . . . I argue"), it is a good idea to mix first-person assertions with ones like the following.

- ▶ X is right that certain common patterns can be found in the communities.
- ▶ The evidence shows that _____.
- ▶ X's assertion that _____ does not fit the facts.
- ▶ Anyone familiar with _____ should agree that _____.

One might even follow Mantsios's lead, as in the following template.

- ▶ But _____ are real, and are arguably the most significant factor in _____.

On the whole, however, academic writing today, even in the sciences and social sciences, makes use of the first person fairly liberally.

See pp. 252–59 for an example of the way a physicist uses the first person.

ANOTHER TRICK FOR IDENTIFYING WHO IS SPEAKING

To alert readers about whose perspective you are describing at any given moment, you don't always have to use overt voice markers like "X argues" followed by a summary of the argument. Instead, you can alert readers about whose voice you're
