

INSTRUCTIONS

You are employed as a statistician for a company that makes household products, which are sold by part-time salespersons who work during their spare time. The company has four salespersons employed in a small town. Let us denote these salespersons by A, B, C, and D.

The sales records (in dollars) for the past 6 weeks for these four salespersons are shown in the table below. Week A B C D

1	1774	2205	1330	1402	2	1808	1507	1295	1665	3	1890	2352	1502	1530	4	1932	1939	1104	1826	5	1855	2052	1189	1703	6	1726	1630	1441	1498
---	------	------	------	------	---	------	------	------	------	---	------	------	------	------	---	------	------	------	------	---	------	------	------	------	---	------	------	------	------

Your supervisor has asked you to prepare a brief report comparing the sales volumes and the consistency of sales of these four salespersons. Use the mean sales for each salesperson to compare the sales volumes. Choose an appropriate statistical measure to compare the consistency of sales. Make the calculations and write a 700-word report comparing the sales volumes and the consistency of sales of these four salespersons. Format your assignment consistent with APA guidelines. Click the Assignment Files tab to submit your assignment.
