

Step 4: Slide the bottom piece to the top edge of the square and tape. Use the image below as an example. It is not drawn to size.

Step 5: Slide the left piece to the right edge of the square and tape. Use the image below as an example. It is not drawn to size.

Step 6: Create an image using your template

Use your creativity and decide what your "original" template resembles. *The image I am using as an example can be a fish or a turtle standing in water.*

****** You may need to try part 1 several times until you create a template you are satisfied with. ******
