Talents and Skills

Introduction

As one of the greatest and important aspect, talent is seen as a call, which can be defined as the power of mind given to an individual so that he or she can make improvement and make the current situation better for him and others. Skills, on the other hand, are the capacity to act and perform any task whose results are put into consideration at a given time using required energy. Below is a discussion of how I intend to use my skills and talent which include reading, public speaking, and beadwork to make the world a better place for human beings.
