

Consider This: Your Turn *continued*

Part 2: ☀ Now that you have looked over your results, did you neglect to include any appliances? How did you determine the costs you used in your calculations?

2: Analyze Profit Potential

Professional

Part 1: You work as an intern in the college student services department and have been asked to create a worksheet that will aid the clubs on campus in managing their budgets. Each club is allocated money at the beginning of the year and can hold fund-raisers to raise more money for events. Each club is required to save five percent of their income for use at the start of the next year. Table 2–9 shows the clubs that you are working with, as well as their initial allocation and estimated fund-raiser amounts. You will need to calculate how much they need to save as well as the average, lowest, and highest values for the clubs' budgets. Use the concepts and techniques presented in this chapter to create and format the worksheet.

Table 2–9 Student Club Data

Club	Allocation	Fund-Raisers
Acting Club	\$40,000	\$10,000
Golf Club	\$25,500	\$5,000
Gaming Club	\$12,750	\$2,000
Math Club	\$5,000	\$1,000
Photography Club	\$3,500	\$2,500
Music Club	\$15,00	\$7,200

Part 2: ☀ How did you decide on the formula to use for the amount each club needs to save? Which formats did you use and why? Which theme did you select for your worksheet?

3: Internet Service

Research and Collaboration

Part 1: You and your friends have decided to subscribe to a new Internet service provider. You would like to maximize services while keeping costs low. As a group, research and find three to five Internet service providers in your area. For each company, find the best service package as well as the basic service package. Using the cost figures you find, calculate the cost per month for each service for a year. Include totals, minimum, maximum, and average values. Use the concepts and techniques presented in this chapter to create and format the worksheet.

Part 2: ☀ Which companies did you choose for your report? Which services offered the best deals that you would be willing to use?

Learn Online

Reinforce what you learned in this chapter with games, exercises, training, and many other online activities and resources.

Student Companion Site Reinforcement activities and resources are available at no additional cost on www.cengagebrain.com. Visit www.cengage.com/ct/studentdownload for detailed instructions about accessing the resources available at the Student Companion Site.

Microsoft Office and Concepts CourseMate If you have a Microsoft Office and Concepts CourseMate access code, you can reinforce and extend your learning with MindTap Reader, practice tests, video, and other premium content for Microsoft Office and Concepts. To sign in to the Microsoft Office and Concepts CourseMate at www.cengagebrain.com, you first must create a student account and then register this book, as described at www.cengage.com/ct/studentdownload.

SAM Put your skills into practice with SAM! If you have a SAM account, go to www.cengage.com/sam2013 to access SAM assignments for this chapter.
