Figure 2-93

13. Create a query for the Item table that displays the average Wholesale Price and the average Base Cost of all items. Save the query as Lab 2-2 Step 13 Query.
14. Submit the revised database in the format specified by your instructor.
15. 🌟 There are two ways to create the query in step 1. What are they? Which one did you use?

Lab 3: Expand Your World: Cloud and Web Technologies

Creating Queries, Customizing the Navigation Pane, and Using the Excel Web App

Problem: Shopper is a small business that does personal shopping for clients. You will create two queries for the owner, customize the Navigation Pane, export a query in CSV format, open the exported file, and then modify the file using the Excel Web app.

Note: To complete this assignment, you will be required to use the Data Files for Students. Visit www.cengage.com/ct/studentdownload for detailed instructions or contact your instructor for information about accessing the required files.

Instructions: Perform the following tasks:

1. Open the Lab 3 Shopper database. Create and save a query that joins the Shopper and Client tables. Include the Last Name and First Name from the Shopper table and the Client Number, Last Name, First Name, and Balance fields from the Client table. Sort the query by shopper Last Name and Client Number.
