

Make sure to set the `SizeMode` property of the picture box control to `StretchImage`.

- 2.3 Write a project to display a weather report. The user can choose one of the radio buttons and display an icon and a message. The message should give the weather report in words and include the person's name (taken from the text box at the top of the form). For example, if the user chooses the Sunny button, you might display "It looks like sunny weather today, John" (assuming that the user entered *John* in the text box).

Include keyboard access keys for the button and radio buttons. Make the *Exit* button the Cancel button and include ToolTips.

The four icons displayed are called `Cloud.ico`, `Rain.ico`, `Snow.ico`, and `Sun.ico`. (See the note at the top of the exercises for graphic file locations.)

- 2.4 Write a project that will input the user name and display a message of the day in a label, along with the user's name. Include buttons (with keyboard
