

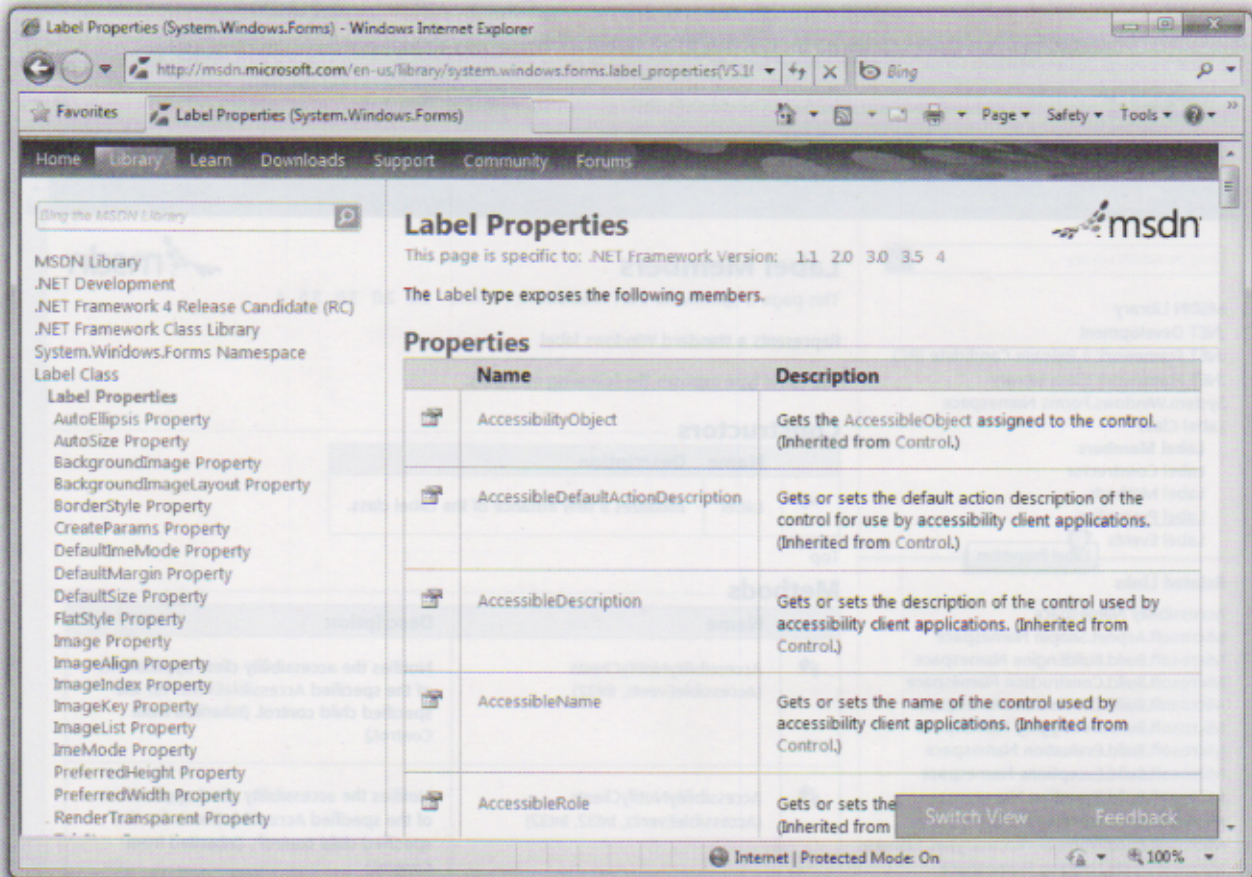

Figure 1.56

Display the properties of a Label control, along with an explanation of each, by selecting *Label Properties* in the TOC.

Managing Windows

At times you may have more windows and tabs open than you want. You can hide or close any window, or switch to a different window.

To close a window that is a part of a tabbed window, click the window's Close button. Only the selected window will close.

To switch to another window that is part of a tabbed window, click on its tab.

For additional help with the environment, see Appendix C, "Tips and Shortcuts for Mastering the Visual Studio Environment."

Feedback 1.1

Note: Answers for Feedback questions appear in Appendix A.

1. Display and examine the list of properties for a Button control.
2. Display the Editor window of your Hello World project. Click on the Close method to place the insertion point. Press the F1 key to view context-sensitive Help.
